

## PROCUNTOR'S NEW FEATURES IN VERSION RELEASE 36.0

INVOICE CIRCULATION	
<p><b>New view: Invoice circulation Hub</b></p>	<p>We have released a new invoice search view called <i>Invoice circulation hub</i>. Purpose of the view is to enable users to see all invoices that are currently in circulation on one comprehensive view.</p> <p>The Invoice Circulation Hub can be found from the navigation menu in <i>Search &gt; Invoice circulation hub</i>.</p> <p>On the Invoice Circulation Hub view, it is possible to search purchase, travel and/or expense invoices, depending on the user rights.</p> <p>The current verifier of the invoice can be seen in the search results table in a new column: "Current verifier". <i>Current verifier</i> refers to the verifier of approver that is next in line in the approval circulation.</p> <p>Clicking on the invoice opens the <i>Verification</i> view of the invoice. The more detailed information about the invoice's approval information can be seen here.</p> <p>In this first version, the Invoice Circulation Hub cannot be accessed if the user has any personal restrictions in their user rights regarding purchase, travel or expense invoices. The view will be developed further in the next versions of Procuntor. We will add new features to the view in future updates.</p> <p>Note! Invoices that need your verification/approval can be searched by using the old features such as the <i>Invoices waiting for verification</i> widget on the frontpage or the <i>Invoices to verify</i> search view. The new hub view, on the other hand, can be used to see <i>all</i> invoices in approval circulation.</p>
<p><b>Defining a global sending interval for receiving notifications of invoice circulation</b></p>	<p>We have released a new feature which enables the main users of environments to define how often notifications and reminders are sent for users of invoices that are in circulation in the environment.</p> <p>In addition to sending notifications of invoices that are sent to circulation, it is now also possible to send reminders to users who have not yet verified or approved invoices that are assigned to them in the circulation.</p>

	<p>Purpose of the feature is to improve communication in general related to verification and approval circulation. When users are reminded of invoices that need actions from them, the invoice circulation takes less time and invoices can be paid faster.</p> <p>The new feature can be found in <i>Management &gt; Company info &gt; Approval circulation settings</i>, under "Reminder interval". Select a suitable option for your environment from the drop-down menu. See more information of how the changes affect the notification by selecting the information icon next to the drop-down menu.</p> <p>Saved changes affect all users in the environment.</p>
<h2>USABILITY AND ACCESSIBILITY IMPROVEMENTS</h2>	
<p><b>Improved accessibility with screen readers</b></p>	<p>To better enable screen reader use, Procountor's navigation on the side and top bars now have readable titles. In addition, we have improved the top bar search field so that it is available to screen readers. These updates are a part of on-going development.</p>
<p><b>Top bar search</b></p>	<p>Searching in the Procountor top bar has been improved, there are more results and their relevance is higher.</p>
<p><b>The order of frontpage's Quick links</b></p>	<p>The default order of <i>Quick links</i> has been updated. The links are now shown in the order of content count. The default order can be set back to alphabetical by pressing the arrow icon in the Quick links widget.</p>
<p><b>Updated visual appearance of grids and checkboxes</b></p>	<p>We have updated the visuals of grids and checkboxes so that it is faster to see which options are selected.</p>
